

ScholarHub JSS Study Guide

Welcome

This guide is designed for Junior Secondary School students. It introduces the major subjects studied at the JSS level and provides practical study advice to help learners build a strong academic foundation.

How to Use This Guide

Read one section at a time, revise class notes alongside this guide, practice questions regularly, and ask teachers whenever a topic is unclear.

English Language

Focus on grammar, comprehension, essay writing, vocabulary, spelling, and speaking clearly. Read storybooks and newspapers regularly to improve language skills.

Mathematics

Master whole numbers, fractions, decimals, percentages, algebra, geometry, and simple statistics. Practice calculations every day.

Basic Science

Learn about living things, matter, energy, the human body, weather, and environmental conservation through observation and experiments.

Other Core Subjects

Social Studies: Culture, citizenship, family and society.

Basic Technology: Simple machines, drawing, tools and safety.

Computer Studies: Computer parts, typing, basic software, internet safety.

Civic Education: Rights, responsibilities and good leadership.

Sample Study Timetable

Study for 30–45 minutes per subject, take short breaks, and revise difficult topics at the end of each week.

Examination Success Tips

Attend classes regularly, complete assignments, solve past questions, avoid cramming, sleep well before examinations, and believe in your ability to improve.

Motivation

Every expert was once a beginner. Stay consistent, remain curious, and let ScholarHub support your learning journey one lesson at a time.
